

Red Cycle

Key Passage Activities

1. Key Passage Concentration: Provide 20 cups with the Key Passages written on 10 labels and the Key Passage reference written on 10 labels. Place the labels on the inside of the cups. Place the cups upside down on the table with the key passages on one side and the key passage references on the other side. Ask a driller to choose 2 cups-one from each side and see if they can make a correct match. If the passages match correctly with the reference, leave the cups turned up. If they do not match correctly with the reference, leave the cups turned upside down again. Continue playing until all of the key passages can be matched.
2. Key Passage Matching Game: Cover a shoe box lid or a gift box lid with paper. Make 2 rows of 5 slits down each side of the top of the box. The slits need be large enough to fit a craft stick in them. Write the Key Passage title under each slit. Write each Key Passage references on a separate craft stick. The driller will match the craft stick to correct Key Passage.
3. Sticky Key Passage Poster: Use one half sheet of poster board. Write the Key Passages at random all over the poster. Have the Key Passage references written on a set of sticky notes. Allow the driller to “stick” the correct reference on each Key Passage.
4. Pass the Bible: Give each child a Key Passage reference card and have them place it at the correct spot in a Bible. When the music starts to play, the drillers will pass their Bibles. When the music stops, the drillers must open the Bible they are holding to the marked Key Passage and say the Key Passage. Continue until each driller has had several turns.
